THERMOCHIMICA ACTA, VOLUME 36 (1980)

SUBJECT INDEX

Acids,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, cycloalkanes, alkenes, aromatic hydrocarbons, alcohols, mercaptans, chloro and bromoalkanes, nitriles, esters, — and aldehydes (Ducros et al.) 39
Activated carbon regeneration,
thermoanalytical study of —. Part IV. Adsorption equilibria for phenol, aniline and their nitro-derivatives on granular activated carbon (Amicarelli, Baldassarre) 107
Alcohols,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, cycloalkanes, alkenes, aromatic hydrocarbons, —, mercaptans, chloro and bromoalkanes, nitriles, esters, acids and aldehydes (Ducros et al.) 39
Aldehydes,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, cycloalkanes, alkenes, aromatic hydrocarbons, alcohols, mercaptans, chloro and bromoalkanes, nitriles, esters, acids and — (Ducros et al.) 39
Aliphatic amines,
thermodynamic studies of binary mixtures containing an — as one component: excess volumes of some diethylamine solutions (Rao, Suri) 243
Alkali-metal complexes,
formation of proton and — with ligands of biological interest in aqueous solution. Part I. Potentiometric and calorimetric investigation of H^+ and Na^+ complexes with citrate, tartrate and malate (Arena et al.) 329
Alkanes,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to — cycloalkanes, alkenes, aromatic hydrocarbons, alcohols, mercaptans, chloro and bromoalkanes, nitriles, esters, acids and aldehydes (Ducros et al.) 39
Alkenes,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application of alkanes, cycloalkanes, —, aromatic hydrocarbons, alcohols, mercaptans, chloro and bromoalkanes, nitriles, esters, acids and aldehydes (Ducros et al.) 39
Amine hydrothiocyanates,
studies on —. II. Solubilities and heats of solution in some organic solvents (House, Jepsen) 325
Ammonium hexachloroplumbates,
thermal reactions of — in the solid state. Part III. Thermolysis of — and methyl-substituted — (Błażejowski, Szychiński) 197
Ammonium metavanadate,
thermal decomposition of — (Selim et al.) 287
Ammonium salts,
intermediate species in thermal reactions between mixed ethylenediamine-*o*-phenanthroline cobalt(III) complexes and — in the solid phase (Grassini-Strazza et al.) 161
Aniline,
thermoanalytical study of activated carbon regeneration. Part IV. Adsorption equilibria for phenol, — and their nitro-derivatives on granular activated carbon (Amicarelli, Baldassarre) 107
Aromatic hydrocarbons,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, cycloalkanes, alkenes, —, alcohols, mercaptans, chloro and bromoalkanes, nitriles, esters, acids and aldehydes (Ducros et al.) 39

Benzene,
thermal treatment of non-porous silica, limited changes in the magni-

tude of the BET-C constant and their influence on adsorption: reference data for benzene adsorption (Khalil) 225
Benzoic acid,
a DSC study of —: a suggested calibrant compound (Murray et al.) 97
o-Benzoic sulfimide,
coordination compounds of biological interest: thermal properties of some compounds of saccharin (—) with divalent metal ions (Magri et al.) 279
BET-C constant,
thermal treatment of non-porous silica, limited changes in the magnitude of the — and their influence on adsorption: reference data for benzene adsorption (Khalil) 225
Bivalent metal ions,
a thermodynamic study of the complexing of some — with *N*-*o*-tolylbenzohydroxamic acid (Shukla) 189
Bromoalkanes,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, cycloalkanes, alkenes, aromatic hydrocarbons, alcohols, mercaptans, chloro and —, nitriles, esters, acids and aldehydes (Ducros et al.) 39

Cd(II),
chelation of furan-2-carboxylic acid with Ni(II), —, Zn(II) and Pb(II) in 50% v/v dioxane—water (Sandhu, Sharma) 247
Chloroalkanes,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, cycloalkanes, alkenes, aromatic hydrocarbons, alcohols, mercaptans, — and bromoalkanes, nitriles, esters, acids and aldehydes (Ducros et al.) 39
Chromium(III) oxalate,
thermal studies on oxalate complexes. II. Complexes of iron(III) and — (House, Blumthal) 79
Citrate,
formation of proton and alkali-metal complexes with ligands of biological interest in aqueous solution. Part I. Potentiometric and calorimetric investigation of H^+ and Na^+ complexes with —, tartrate and malate (Arena et al.) 329
Cobalt(III) ammine chlorides,
the application of thin-layer chromatography to thermal decomposition reactions: some — (Wendlandt, Simmons) 239
Cobalt and nickel double hydroxy-chlorides,
thermal decomposition of — (Rasines, García Casado) 351
Consecutive reactions,
investigation of the reaction kinetics of — by TGA (Heide et al.) 151
Consecutive reactions,
kinetic analysis of two — from thermogravimetric data under non-isothermal conditions. Part II. Dehydration of $CuSO_4 \cdot 5\ H_2O$ (Marcu, Segal) 235
Cooling rate,
the effects of heating rate and — on the characteristics of the calorimetric glass transition for glassy polymers (Saffell) 251
Coordination compounds,
— of biological interest: thermal properties of some compounds of saccharin (*o*-benzoic sulfimide) with divalent metal ions (Magri et al.) 279
$CsNd(SO_4)_2 \cdot 4\ H_2O$,
kinetics of the dehydration of — (Bukovec et al.) 217
$Cs_2Zr_2(O_2)_2F_6 \cdot 2\ H_2O$,
solid-state decomposition studies on fluoroperoxo species of transition metals. Part VI. Kinetics of isothermal decomposition of $Rb_2Zr_2(O_2)_2F_6 \cdot 2\ H_2O$ and — (Jere, Kaushik) 307
$CuSO_4 \cdot 5\ H_2O$,
kinetic analysis of two consecutive reactions from thermogravimetric data under non-isothermal conditions. Part II. Dehydration of — (Marcu, Segal) 235
Cycloalkanes,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, —, alkenes, aromatic hydrocarbons, alcohols, mercaptans, chloro and bromoalkanes, nitriles, esters, acids and aldehydes (Ducros et al.) 39

Desulfurization,
a thermogravimetric study of the sulfation of limestone and dolomite—prediction of pressurized and atmospheric fluidized-bed — (Ulerich et al.) 1

Diacid,
the determination by thermometric titration of the thermodynamic microconstants and microfunctions of an asymmetrical — (Bernard, Burgot) 377
Diethylamine,
thermodynamic studies of binary mixtures containing an aliphatic amine as one component: excess volumes of some — solutions (Rao, Suri) 243
N,N-Dimethylacetamide,
thermal reactions of lead(IV) chloride complexes in the solid state. Part II. Thermolysis of molecular complexes of $PbCl_4$ and H_2PbCl_6 with *N,N*-dimethylformamide and — (Błażejowski, Szychliński) 315
N,N-Dimethylformamide,
thermal reactions in lead(IV) chloride complexes in the solid state. Part II. Thermolysis of molecular complexes of $PbCl_4$ and H_2PbCl_6 with — and *N,N*-dimethylacetamide (Błażejowski, Szychliński) 315
2,4-Dinitroso-1,3-naphthalenediol,
thermal and spectral studies of some divalent metal chelates of — (Bottei, Lusardi) 17
Dolomite,
a thermogravimetric study of the sulfation of limestone and ——prediction of pressurized and atmospheric fluidized-bed desulfurization (Ulerich et al.) 1
Epoxy resin,
determination of cure times and activation energies of one-container — systems by isothermal DSC (Miller, Oebser) 121
Esters,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, cycloalkanes, alkenes, aromatic hydrocarbons, alcohols, mercaptans, chloro and bromoalkanes, nitriles, —, acids and aldehydes (Ducros et al.) 39
Ethylenediamine-*o*-phenanthroline cobalt(III) complexes,
intermediate species in thermal reactions between mixed — and ammonium salts in the solid phase (Grassini-Strazza et al.) 161

Foundry core binders,
measurement of evolved gas resulting from closed-system pyrolysis of — (Miller, Oebser) 133
Furan-2-carboxylic acid,
chelation of — with Ni(II), Cd(II), Zn(II) and Pb(II) in 50% v/v dioxane—water (Sandhu, Sharma) 247

Glass transition,
the effects of heating and cooling rate on the characteristics of the calorimetric — for glassy polymers (Saffell) 251
Glassy polymers,
the effects of heating and cooling rate on the characteristics of the calorimetric glass transition for — (Saffell) 251
Goethite,
infrared study of the thermal transformation of — to magnetite in alkali-iodide disks (Mendelovici, Yariv) 25

Heating rate,
the effects of — and cooling rate on the characteristics of the calorimetric glass transition for glassy polymers (Saffell) 251
H_2PbCl_6,
thermal reactions of lead(IV) chloride complexes in the solid state. Part II. Thermolysis of molecular complexes of $PbCl_4$ and — with *N,N*-dimethylformamide and *N,N*-dimethylacetamide (Błażejowski, Szychliński) 315
Hydrazine perchlorate ammoniates,
thermal analysis of hydrazine perchlorate hydrates and — (Patil et al.) 91
Hydrazine perchlorate hydrates,
thermal analysis of — and ammoniates (Patil et al.) 91
Hydroxy-chlorides,
thermal decomposition of cobalt and nickel — (Rasines, García Casado) 351

Ill-defined material,
microcalorimetric determination of the heat capacity of — (Lamprecht, Schaarschmidt) 169
Inverse gas chromatography,
studies of pyrolysis and air heating of rayon by — (Friedman, Miller) 113
Iodine oxides,
thermal behaviour of corona-precipitated — (Wikjord et al.) 367
Iron(III) oxalate,
thermal studies on oxalate complexes. II. Complexes of — and chromium(III) (House, Blumthal) 79

Kinetic parameters,
computer-determined — from TG curves (Reich, Stivala) 103

Lead(IV) chloride complexes,
thermal reactions of — in the solid state. Part II. Thermolysis of molecular complexes of $PbCl_4$ and H_2PbCl_6 with *N,N*-dimethylformamide and *N,N*-dimethylacetamide (Błażejowski, Szychliński) 315
Lead(IV) chloride complexes,
thermal reactions of — in the solid state. Part III. Thermolysis of ammonium and methyl-substituted ammonium hexachloroplumbates (Błażejowski, Szychiński) 197
Limestone,
a thermogravimetric study of the sulfation of — and dolomite—prediction of pressurized and atmospheric fluidized-bed desulfurization (Ulerich et al.) 1

Magnetite,
infrared study of the thermal transformation of goethite to — in alkali-iodide disks (Mendelovici, Yariv) 25
Malate,
formation of proton and alkali-metal complexes with ligands of biological interest in aqueous solution. Part I. Potentiometric and colorimetric investigation of H^+ and Na^+ complexes with citrate, tartrate and — (Arena et al.) 329
McBride coefficients,
— of select sulphur compounds (Bennett, Meisen) 173
Mercaptans,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, cycloalkanes, alkenes, aromatic hydrocarbons, alcohols, —, chloro and bromoalkanes, nitriles, esters, acids and aldehydes (Ducros et al.) 39
Metal ions,
coordination compounds of biological interest: thermal properties of some compounds of saccharin (*o*-benzoic sulfimide) with divalent — (Magri et al.) 279
Microprocessor,
— controlled thermogravimetric separations (Cassel, Gray) 265

Ni(II),
chelation of furan-2-carboxylic acid with —, Cd(II), Zn(II) and Pb(II) in 50% v/v dioxane—water (Sandhu, Sharma) 247
Nickel and cobalt double hydroxy-chlorides,
thermal decomposition of — (Rasines, García Casado) 351
Nitriles,
estimation of the enthalpies of vaporisation of liquid organic compounds. Part 1. Application to alkanes, cycloalkanes, alkenes, aromatic hydrocarbons, alcohols, mercaptans, chloro and bromoalkanes, —, esters, acids and aldehydes (Ducros et al.) 39

Oxalate complexes,
thermal studies on —. II. Complexes of iron(III) and chromium(III) House, Blumthal) 79

Pb(II),
chelation of furan-2-carboxylic acid with Ni(II), Cd(II), Zn(II) and — in 50% v/v dioxane—water (Sandhu, Sharma) 247
Phenol,
thermoanalytical study of activated carbon regeneration. Part IV. Adsorption equilibria for —, aniline and their nitro-derivatives on granular activated carbon (Amicarelli, Baldassarre) 107
D-α-Phenylglycine,
thermodynamics of nitrogen compounds. Part VI. Thermodynamic study of *N*-phenylglycine and — (Sabbah, Skoulika) 179
N-Phenylglycine,
thermodynamics of nitrogen compounds. Part VI. Thermodynamic study of — and D-α-phenylglycine (Sabbah, Skoulika) 179
Pore structure,
surface area and — of thermally treated silica gel (Abo-El-Enein et al.) 299
Proton complexes,
formation of — and alkali-metal complexes with ligands of biological interest in aqueous solution. Part I. Potentiometric and calorimetric investigation of H^+ and Na^+ complexes with citrate, tartrate and malate (Arena et al.) 329

Rayon,
studies of pyrolysis and air heating of — by inverse gas chromatography

(Friedman, Miller) 113
$Rb_2Zr_2(O_2)_2F_6 \cdot 2\ H_2O$,
solid-state decomposition studies on fluoroperoxo species of transition metals. Part VI. Kinetics of isothermal decomposition of — and $Cs_2Zr_2(O_2)_2F_6 \cdot 2\ H_2O$ (Jere, Kaushik) 307

Saccharin,
coordination compounds of biological interest: thermal properties of some compounds of — (*o*-benzoic sulfimide) with divalent metal ions (Magri et al.) 279
Silica,
thermal treatment of non-porous —, limited changes in the magnitude of the BET-C constant and their influence on adsorption: reference data for benzene adsorption (Khalil) 225
Silica,
thermal treatment of non-porous —. The porosity characteristics of silica aerosil TK 800 induced by trimethylchlorosilane treatment (Khalil) 141
Silica gel,
surface area and pore structure of thermally treated — (Abo-El-Enein et al.) 299
Sodium hexafluorosilicate,
thermal decomposition of — (Vanka, Vachuška) 387
Solid—solid reactions,
enthalpimetric measurements in —. Part II. Study of the uranyl nitrate—urea system by DSC (Siracusa, Abate) 207
Sulphur compounds,
McBride coefficients of select — (Bennett, Meisen) 173
Surface area,
— and pore structure of thermally treated silica gel (Abo-El-Enein et al.) 299

Tartrate,
formation of proton and alkali-metal complexes with ligands of biological interest in aqueous solution. Part I. Potentiometric and calorimetric investigation of H^+ and Na^+ complexes with citrate, — and malate (Arena et al.) 329
Thermal analysis techniques,
—: a survey (Wendlandt) 393
Thermal energy storage materials,
—, a DSC study (Elder) 67
Thermodynamic microconstants,
the determination by thermometric titration of the — and microfunctions of an asymmetrical diacid (Bernard, Burgot) 377
Thermodynamic microfunctions,
the determination by thermometric titration of the thermodynamic microconstants and — of an asymmetrical diacid (Bernard, Burgot) 377
Thermogravimetric separations,
microprocessor-controlled — (Cassel, Gray) 265
Thermometric titration,
the determination by — of the thermodynamic microconstants and microfunctions of an asymmetrical diacid (Bernard, Burgot) 377
Thorium tetrafluoride, vaporization thermodynamics of — (Nagarajan et al.) 85
N-*o*-Tolylbenzohydroxamic acid,
a thermodynamic study of the complexing of some bivalent metal ions with — (Shukla) 189
Trimethylchlorosilane,
thermal treatment of non-porous silica. The porosity characteristics of silica aerosil TK 800 induced by — treatment (Khalil) 141

Uranyl nitrate,
enthalpimetric measurements in solid—solid reactions. Part II. Study of the ——urea system by DSC (Siracusa, Abate) 207
Urea,
enthalpimetric measurements in solid—solid reactions. Part II. Study of the uranyl nitrate ——system by DSC (Siracusa, Abate) 207

Zinc carbonate,
kinetic aspects of the thermal decomposition of — (Dollimore et al.) 343
Zinc ferrite,
kinetics and mechanism of — formation (Kolta et al.) 359
Zn(II),
chelation of furan-2-carboxylic acid with Ni(II), Cd(II), — and Pb(II) in 50% v/v dioxane—water (Sandhu, Sharma) 247
